DESCRIPTION

I had developed software efficiently, I had been in excellent and proficient teams, I had developed web pages with different startups, I had reached with the client specs, with the optimization, with the positioning and the UI/UX design. I could improve the company and the team work with my skills and I'm able to listen other people when they do feedback.

PROFESSIONAL EXPERIENCE

Deposito San José, Bogotá, Colombia ● Front end Developer
01/2018 – 01/2023

I started like a seller, but I was scaling since obtain the front end position, because I was studying while I'm working in the company,, The company was a medium size so, only had 2 programmers in the position to mantain the web page updated and response the different requirements for this channel.
